

The trouble with that democratic candidate for governor of Massachusetts was that he was unable to put the "bunk" in Bunker Hill. Lawlessness in a good cause is worse than lawlessness in a bad cause—because lawlessness always discredits the cause in behalf of which it is invoked. "Something beside the treaty has perished," cried the New York World. Yea, there's the democratic party, frinstance.

OLD LAND MARK SOLD AT AUCTION

(Correspondence Associated Press)
LANARKSHIRE, Scotland, Nov. 25.—Hamilton Palace, seat of the late duke of Hamilton and Brandon, who was premier duke of Scotland, is being dismantled and even the furnishings sold at auction. Remarkable prices have been realized from the sale of pictures and jewels. The total aggregated the equivalent of \$1,277,700.

Most notable among the paintings was that of the "Beckworth Children" by Romney which brought \$250,000. Other prices were \$24,000 for the Charles II oak balustrade, \$15,000 for the paneling in the old state dining room, and \$2,750 for the Seventeenth century oak paneling of the picture gallery.

The black marble staircase which consists of a double flight of steps and a gallery failed to find a purchaser. The palace stands in the heart of the Lanarkshire coal mining district, immortalized by Scott in one of his most spirited ballads. It was built in 1822 and 1829 and one of its marvels was a portico of monolith Corinthian columns which were copied from the Temple of Vespasian at Rome. The foundations of the palace have become so affected by time that it was found necessary to dismantle the historic edifice.

WARNING ABOUT AN ERUPTION

(Correspondence Associated Press)
HILLO, Island of Hawaii, T. H., Nov. 30. By Mail.—Warning that the recent spectacular outbreak of the sporadic volcano Mauna Loa may presage further damaging lava flows and earthquakes is given by Professor T. A. Jaggar, jr., volcanologist.

On the heels of Professor Jaggar's warning came the greatest outbreak in ten years from Kilauea, which, although always more or less active, on this occasion indulged in an exceptionally brilliant demonstration.

Professor Jaggar said: "The sequence of eruptions on Mauna Loa in 1914, 1916 and 1919 points to a period of unusually strong activity, especially as Kilauea keeps up high pressure and increasing overflow."

Such sequence on former occasions has led to great crises of lava flow and earthquake and the warning in the present instance should not be disregarded. In view of the menace to plantations, harbors, ranch lands and settlements and the presence of a national park in the midst, the least which can be done is to provide accurate maps of the land."

STUDENTS FILL UNIVERSITIES

(Correspondence Associated Press)
COLOGNE, Nov. 24.—German newspapers say 4,000 more students enrolled in the universities of Germany this year than in 1914. In the year of the beginning of the war there were 50,990 students enrolled in the various universities while in 1919 there are approximately 91,000. This represents an increase of nearly 2,000 each for each of the twenty-three national universities. In eleven technical schools more than 16,500 have enrolled as compared with 10,000 in 1914.

NEW TRIBE FOUND ON ALASKA COAST

(Correspondence Associated Press)
CORDOVA, Alaska, Nov. 1.—By Mail.—Natives of the Lower Kuskokwim district, southwest of Iditarod in southwestern Alaska, were described by a traveler, recently returned from that section, as being of a radically different type from those found along the Yukon and Tanana rivers. They are, he said, a short, stocky people, with flat or "dish" faces. During the summer months they live in the open, but during the winter, he said, they live in holes dug in the ground.

The natives have bath houses, and, contrary to the common belief, bathe often. Part of the efficacy of the bathing, however, is lost through the fact they never launder their clothes.

When President Wilson declares that he expects to put his covenant through without changes the senate majority has publicly declared are essential to its Americanization he seems to overestimate the cowardice and lack of self respect of those whom he hopes to drive from their positions.

HERE!

Action On Your Money In 2 to 3 Weeks

Our well No. 1, Block 40, Burkburnett, Texas, is now drilling. We are sending it down just as fast as the bit can punch the hole in the ground, and it should be completed within 2 to 3 weeks.

We are in the heart of production. On three sides of us are producing oil wells. It is not a question of whether we get a well. It is a question of how big a well we get.

Just 2640 feet from our well No. 1 is the famous Humble Gusher, reported in at 2,000 barrels, one of the finest wells in the whole Burkburnett field.

Just 2340 feet from our well No. 1 is the famous Humble No. 2 well, a near rival of its big brother—and a well that came in reported at 1,700 barrels.

These two wells are on the north of us. On the south of us are 3 other producing wells—only 1,800 feet distant.

On the west of us in Block 38 (we are in Block 40), another producing well was struck last week by the Magnolia Petroleum Co., so telegraphic advices from Burkburnett state.

To the northwest of us is the property of the famous Marine Oil Co., which recently sold for THREE AND ONE-HALF MILLION DOLLARS. This paid each stockholder over \$1700 for each share held.

Just the width of the public road from us is the property of the large Humble Oil Co. This company is said to have been offered \$40,000,000.00 for a half interest in its business by the Standard Oil Co.

Our Stock Nearly All Subscribed—Only a Few Shares Remain to Be Offered for Sale

For a few days only we are offering you an opportunity to purchase an interest in this drilling well. The whole capitalization of this company is only 5,200 shares. Only a few shares remain for sale. This will be gone within a few days. The price today is \$25.00 per share. Get yours now. This stock may advance to \$30.00 or \$40.00 any day—what is left of it.

What a Small Investment in Other Burkburnett Companies Has Become Worth in a Short While

THESE ARE ONLY A FEW EXAMPLES. MORE THAN 100 OTHER COMPANIES IN THIS FIELD HAVE PAID THEIR STOCKHOLDERS ENORMOUS PROFITS IN THE PAST FEW MONTHS.

One share Fowler Oil Co., stock bought at \$100 sold after well came in for \$25,000.

One share Bur-Waggoner Oil Co., stock bought at \$50, sold after well came in for \$3,333.00.

One share Marine Oil Co., bought at \$100, sold after well came in for \$1,750.

One share M & P. Burk Co., stock bought at \$100, sold after well came in for \$950.

One share Kemp-Munger-Allen Oil Co., stock bought at \$100, sold after well came in for \$3,000.

(Note. Capitalization of Fowler Co. was \$12,000; Bur-Waggoner, \$60,000; Marine, \$200,000; Kemp-Munger-Allen, \$50,000. Capitalization of the Mid-Burnett Oil Ass'n. is \$52,000.)

Get your stock today—you will have to hurry—tomorrow may be too late.

Remember, our well is drilling! Every day it is getting nearer and nearer to oil! Quick action is what you want on your money! That is what you get when you invest in this Company.

YOUR OPPORTUNITY

This is one of the best Burkburnett oil investments ever offered you. The time for you to grasp this opportunity is right now. Such valuable locations as ours are harder to get every day. Leases are selling in this field for as high as \$100,000.00 for a single acre.

Remember, the Mid-Burnett Oil Association is a company with a very small capitalization, the greater portion of our stock is already sold, and the remainder will be placed very soon.

This is an absolutely fair and square, above board proposition from start to finish and we will let you be the judge. Located in the world's greatest oil field in proven territory, with producing wells on almost every hand, conservatively capitalized, managed by business men of integrity and honesty, and not by promoters, his company offers you an opportunity you may never have again to share in the tremendous profits, that are being made in the great Burkburnett oil field.

You can buy any number of shares you wish, from one to a hundred.
